INTRODUCTION

The year 2025
marks 11 years of Prime
Minister Narendra Modi's
government. These
11 years have been
dedicated to bring about
development which is
inclusive, progressive,
and sustainable. The
government under Prime
Minister Modi has been
steadfast in its commitment
of creating equity and
opportunity for all citizens.

PM Modi has brought the politics of development - Vikasvaad - into the mainstream, making it the focal point around which political discourse and policy action now revolves.

Since assuming office in 2014, PM Modi has remained firm in his resolve of keeping 'India First' in every policy formulation and action. This resolve is evident in government's handling of both external and internal security, economic management, empowerment schemes for marginalised groups, efforts at cultural conservation and so on.

Prime Minister Modi's

government has always believed in setting challenging targets, and achieving them before the set deadline. This can be seen across sectorswhether it is in vaccinating the entire eligible population in record time against Covid-19, recording the nation's highest ever exports in history, in the digital revolution which is taking place across India, in achieving monumental targets for rural electrification, in building world class infrastructure or in providing drinking water facilities across households.

In the last 11 years, there has been a paradigm shift in public service delivery and the implementation of government schemes using the JAM Trinity-Jan Dhan, Aadhaar, and Mobile. JAM Trinity is the key enabler of India's transformed and well-developed digital landscape. It has removed intermediaries and permits direct transfer of benefits into an intended beneficiary's bank account.

For a country to prosper, it is imperative that its infrastructure grows rapidly and the government under PM Modi's dynamic leadership understands this. The completion of infrastructure projects that were delayed over decades, as well as starting and completing new ones has been the cornerstone of this government's developmental approach.

In stark contrast to the earlier piecemeal approach to development, the Modi government has brought in a culture of holistic development that leaves no one behind. The massive expansion of welfare coverage over the last 11 years has motivated all Indians to dream big and aspire for greater achievements.

The inclusive and holistic approach of development and welfare schemes has ensured irreversible empowerment for various marginalised groups, helping them become aspirational and self-reliant.

Under PM Modi, India has championed environmental protection globally, emerging as a leader of the movement. Like environment, under PM Modi's leadership, India is also committed towards preservation, and promotion of its rich cultural heritage. The United Nations declared June 21st as International Yoga Day, an acknowledgement of the global recognition of Indian heritage.

India's assertion on the global stage has also undergone a remarkable evolution. The success of Operation SINDOOR demonstrated a new India—resolute, swift, and sovereign in action.

After first assuming elected office in 2001 as Chief Minister of Gujarat and then becoming the Prime Minister of India in 2014. Narendra Modi has set a new benchmark in reforms and governance which has become a model for inclusive development not just for India but for many parts of the world. He has not only encouraged people to aspire but also provided adequate government

support for fulfilling their rising aspirations so every Indian, in 'Amrit Kaal', can be a part of India's growth story.

This book is a comprehensive compendium about India's transformation under PM Modi's visionary leadership across fourteen facets of policymaking, ranging from infrastructure to foreign policy to social justice. This is the story of 11 years of serving the underserved, empowering women, providing opportunities to the youth, and celebrating the farmer. This is the story of new India. (3) * * *

Be it DBT,
or plans to provide facilities like
electricity, water, toilets to poor
people, all these have brought a
revolution at the grassroots level.
These schemes have filled the
poorest of the poor in the country
with a sense of respect and
security.

- Narendra Modi

SERVING THE POOR AND MARGINALIZED

1

OVERVIEW

The Constitution treats every Indian citizen as equal, and guarantees a life of dignity for each of them. Yet despite several decades since independence, in the absence of basic facilities many Indians were living in abject poverty. Understanding the need for this unfortunate scenario to change an irreversible process of development was started with inclusive approach. Since 2014, the government led by Prime Minister Narendra Modi has initiated a development model in which no one is left behind.

This Development model guarantees basic facilities such as drinking water, electricity connections, healthcare, toilets, LPG cylinders, education, and financial inclusion to all, and not just to a privileged few.

In the last 11 years, the Modi government has launched and implemented several welfare schemes to empower every Indian.

The impact of such seamless and irreversible empowerment initiatives can be seen in programmes like MUDRA Yojana and Stand Up India, which are creating a large pool of young entrepreneurs from marginalised groups. More than half of the 52 crore

loans given under MUDRA have been given to SC/ST/OBC entrepreneurs.

This is ushering empowerment of not just individuals, but is also a means to empower the traditionally neglected communities.

In the spirit of inclusive social welfare, the Modi government's historic decision to provide reservations for economically weaker sections of upper castes provided muchneeded support to poor households.

As part of its vision of inclusive development, the government has undertaken many reforms to empower Divyangjan, Transgender persons, Denotified and Nomadic tribes, and other such hitherto unserved or underserved groups. The government's resolve for social justice was evident in its decision to implement **OBC** and EWS reservations in all India quota seats in medical education, ensuring that students from these groups can also aspire to become doctors in affordable government colleges. Likewise, under the Namaste scheme, the government aims to eradicate unsafe sewer and septic tank cleaning practices, so that

sanitation workers can lead a life of dignity.

The most recent celebration of Janjatiya Gaurav Diwas took place from November 15 to 26, 2024, marking the 150th birth anniversary of Bhagwan Birsa Munda, a revered tribal freedom fighter. This observance aimed to honor the contributions of tribal communities to India's history and progress.

The government's efforts to extend welfare provisioning and poverty alleviation have received recognition from global institutions. A recent IMF paper has credited the Modi government for ending extreme poverty in the country. The Global **Multidimensional Poverty** Index (MPI), released by the **United Nations Development** Programme (UNDP) and the Oxford Poverty and Human Development Initiative (OPHI) has also credited India with a reduction in all ten of its **Multidimensional Poverty** Indicators. Serving the poor and the marginalized has been the underlying promise of the Modi government, a promise that is guided by the principle of 'Antyodaya' which means that the goal of development isn't complete till it reaches the last person in society.

have surpassed their respective state average on development parameter

POINTS TO REMEMBER

Antyodaya and saturation coverage end appeasement

Welfare schemes from 2014 have been motivated by the **principle of Antyodaya** (no one is left behind). It means the government is targeting 100% saturation in every scheme.

100% coverage means everyone will get the benefits of governance!

Viksit Bharat
Sankalp Yatra
reached 2.6 lakh
gram panchayats
and more than
4,000 urban local
bodies in the
country and aims
to achieve the
target of taking
public welfare
schemes to 100%
saturation

Irreversible empowerment for marginalised groups

- Earlier, the attitude of certain governments was to patronise the marginalised groups by ensuring some piecemeal benefits.
- They wanted to keep the people dependent on them, and hence, irreversible empowerment was denied.
- But now, PM Modi has ensured a shift from patronage-based support to irreversible empowerment.
- Schemes like Stand Up
 India and MUDRA
 Yojana are empowering individuals from marginalised groups by providing entrepreneurship opportunities.
- These entrepreneurs will shape aspirations and become role models for

the entire community. Ending the politics of low expectations and low delivery

- Once a gas connection is given, an electricity connection is given or a tap water connection is given, no one can take it away.
- Further, the poor become aspirational and have higher expectations since their basic needs are met.
- This creates greater expectations from governments and pushes them to deliver more.
- For a long time, India
 was harmed by politics
 of low delivery and
 low expectations.
 But now, that is being
 changed by PM Modi.

66

Increasing the income of the farmers, reducing the cost of farming, providing modern facilities to the farmers from seed to market is the priority of our government.

- Narendra Modi

ENSURING FARMER WELFARE

2

OVERVIEW

The farmers, agriculture, and its allied activities have always been key elements of India's socio-cultural life and economy. In the last 11 years, Indian agriculture has received new impetus, guided by Prime Minister Narendra Modi's "Beej Se Bazaar Tak" approach, which stands out for its comprehensiveness.

The government has extended income support through PM-Kisan Samman Nidhi, providing farmers with an assured cash transfer of ₹6,000 per year through Direct Benefit Transfer. This supplemental income, received through regular instalments, has cut out intermediaries and enabled even small and marginal farmers to purchase better quality inputs, improve their land productivity, and increase their income.

To offset the inherent risks associated with agriculture, the government introduced the Pradhan Mantri Fasal Bima Yojana, an agricultural insurance system that provides a safety net for farmers against uncontrollable factors like unseasonal rain, pest damage, post-harvest losses, etc. Similarly, the Pradhan Mantri Krishi Sinchayee Yojana has expanded irrigation coverage. India's foodgrain production has touched a new record of 347 MMT in 2024-25.

The results are visible. During the Covid-hit period of 2021-22,

India's foodgrain production touched a new record, with estimates for 2022-23 indicating even higher production. There has also been buoyant growth in the horticulture sector. The allied sectors of Indian agriculture—livestock, forestry & logging, and fishing & aquaculture—are witnessing robust growth and becoming a potential source for improving farmers' income.

The dairy sector, which employs more than eight crore farmers, is performing well. India ranks first in the world in milk production, second in egg production, second in fish production, and fifth in meat production.

To unlock the growth potential of the agriculture and allied sectors, the Government has introduced the Agricultural Infrastructure Fund, a financing facility operational from 2020-21 to 2032-33, for the creation of post-harvest management infrastructure and community farm assets.

The United Nations declared 2023 as the International Year of Millets. Termed "Shree Anna" to highlight its value as a superfood, millets—one of the oldest cultivated crops by humans—are also the crops of the future. In the words of the Prime Minister, "Millets are good for the consumer, cultivator, and the climate."

A priority for the government since 2014 has been the

modernization of Indian agriculture. The use of Soil Health Cards issued by the government has helped farmers make efficient use of various inputs and maximize their yield. Through multiple programmes like the National Mission on Natural Farming (NMNF), which promotes chemical-free and climate-smart agriculture, small farmers are being encouraged to adopt natural and organic farming. This has led to lower investments on inputs, higher income for farmers, and protection from the perils of climate change and other uncertainties.

To achieve the aim of "Beej Se Bazaar Tak", strengthening forward linkages of agriculture is necessary to improve the condition of farmers. Linking agriculture markets throughout the country through the e-NAM initiative has brought transparency and increased competition in agricultural markets.

The last 11 years have seen a paradigm shift in the Indian agriculture sector, making it modern, scientific, and prosperous. Today, the Indian farmer isn't just cultivating for India, but is confidently eyeing the world as a marketplace for its wide-ranging products. PM Modi envisages Indian products on every dining table in world.

COOPERATIVES: DRIVING INCLUSIVE GROWTH

Cooperation has been an integral part of India's heritage.

As our scriptures say, "अल्पानाम् अपि वस्तूनाम्, संहतिः कार्य साधिका॥"

emphasizing that even small things or limited resources, when united, can achieve significant results.

Shri Narendra Modi

Hon'ble PM

Inauguration and Foundation Stone Laying Ceremony for Several Major Initiatives in the Cooperative Sector (24 Feb. 2024)

REVIVING THE SPIRIT OF COOPERATION

Rooted in India's age-old values of collective progress, the cooperative movement is undergoing a robust revival. Once weakened by systemic inefficiencies, it is now re-energized through reforms under the Ministry of Cooperation, established in 2021.

Institutional Reforms & Digital Empowerment

- Model Bye-Laws adopted in 32 States/UTs enable 1+ lakh Primary Agricultural Credit Societies (PACS) to diversify into 25+ activities including dairy, water, fuel, and pharma services.
- Digital transformation through ERP-based computerization of 70,641 PACS (59,810 onboarded), linked with NABARD.
- New platforms by NCCF/NAFED streamline MSP procurement, while a National Cooperative Database and Ranking Framework ensure transparency.

Infrastructure and Income Expansion

- 20,700+ new cooperatives formed; 7,100+ dairy societies strengthened.
- World's largest grain storage plan launched: 11 pilot godowns (9,750 MT) and 500 more underway.
- Primary Agricultural Credit Societies (PACS) act as:
 - CSCs (46,571 delivering ₹81.6 Cr in e-services),
 - Jan Aushadhi Kendras (753 operational),
 - PMKSKs (36,592 upgraded),
 - LPG/fuel dealers, water supply managers, and FPOs.

National-Level Cooperatives with Global Vision

- NCEL: ₹5,396 crore exports; 9,425 members.
- BBSSL: 21,037 members for certified seeds.
- NCOL: 7,037 members; 24 organic products launched worth ₹167.1 lakh.

2025 declared as the International Year of Cooperatives by the UN. India poised to lead globally

SAHKAR SE SAMRIDDHI

From urban women to women living in villages, women engaged in business, or women busy with household chores, the government has taken many steps to make their lives easier.

- Narendra Modi

NEW MOMENTUM FOR SHAKTI

OVERVIEW

India's development is inextricably linked to the development of its women. With this acknowledgment, Prime Minister Narendra Modi's government in the last 11 years has put Nari Shakti at the forefront of India's development journey.

The Modi government understands that empowerment is not a one-stop solution; rather it requires a lifecycle-based approach towards women empowerment. In this regard, welfare programmes for women are designed in a manner to support them at different stages of life to overcome socio-economic barriers to their empowerment.

Mission Poshan is an integrated nutrition support programme to address the challenges of malnutrition in children, adolescent girls, pregnant women, and lactating mothers through a strategic shift in nutrition content and delivery and by the creation of a convergent ecosystem to develop and promote practices that nurture health, wellness, and immunity. Mission Shakti which comprises two sub-schemes 'Sambal' and 'Samarthya' for the safety, security, and empowerment of women. The existing schemes of One Stop Centres (OSC), Women Helplines (181-WHL), and Beti Bachao Beti Padhao (BBBP) together with a new component

of Nari Adalat have been made part of the Sambal sub-scheme; while the schemes of Pradhan Mantri Matru Vandana Yojana (PMMVY), Shakti Sadan (Ujjwala & Swadhar Greh), Working Women Hostel (Sakhi Niwas) and National Creche Scheme (Palna) have been subsumed in 'Samarthya'.

The impact of this approach has been evident in the outcomes, such as an improved sex ratio at birth which is now for the first time 1020 women per 1000 men, a rise in institutional deliveries, declining infant mortality, and a lower maternal mortality rate.

For Modi government providing women a life of dignity is a cornerstone of governance. This promise manifests itself in the increased usage of LPG cylinders under the Ujjwala Yojana which has saved crores of women from chronic respiratory disorders through smoke-free kitchens. With the success of Swachh Bharat Abhiyan, crores of women are now able to access toilets in their homes without any fear of safety or violation of dignity. Walking long distances to fetch water for daily usage is a thing of past as households across the county are getting tap water connections under the Jal Jeevan Mission which has ended this ordeal.

Women empowerment without economic empowerment of women is meaningless. For

instance, 68% of MUDRA loans or 35.38 crore loans of Rs. 14.72 lakh crore given to women entrepreneurs enabling crores of women across the country to pursue micro-level entrepreneurship and become financially independent. To promote financial inclusion among women, Mahila Samman Savings Certificate was introduced as part of the Union Budget 2023-24, which is a small savings scheme exclusively for female investors.

Under PM Awas Yojana, women are being made owners of the family home thus becoming active participants in household decision-making.

In the 11 years of the Modi government, women have grown from strength to strength. Their success can be seen in the significant increase in the numbers of female police personnel, in the laurels won by sportswomen for the country, and in the enrolment of women in the fields of Science, Technology, Engineering &Maths. Now women are the real partners in development instead of earlier eras in which the schemes were just launched as eyewash for them. Today it is no longer women development, but women-led development.

Lakhpati Didi

POINTS TO REMEMBER

Why women support PM Modi - Social transformation for women empowerment

- Proposal to raise marriageable age of women from 18 years to 21 years helps with education and employment.
- Law against Triple Talaq protects Muslim women from exploitation.
- Increase in paid maternity leave period from 12 weeks to 26 weeks makes work-life balance possible for working women.
- Scrapping of Article 35A has given rights to women in J&K that were historically denied.

* * *

Removing drudgery from the daily life of women In rural or semi-urban areas, even getting basic necessities used to be a battle for women. Not anymore.

Women walked long distances to lakes, ponds or borewells and brought back heavy loads of water.

Women inhaled smoke from wood-fired kitchens. They went out to collect firewood for cooking.

Women had to go to isolated places to relieve themselves, endangering their health, safety and dignity.

Kerosene lamps harmed respiratory health and eyesight of people in poor families, especially women and children. Over 15.6 crore tap water connections.

Ujjwala Yojana's 10.33+ crore LPG connections freed women from respiratory diseases.

THEN NOW

Swachh Bharat's 12 crore toilets have removed these worries. Income generation opportunities through non-biodegradable waste management set-ups.

......

100 % willing household electrification under Saubhagya Yojana.

OVERVIEW

Prime Minister Narendra Modi has famously said, "The world has admitted that India has two limitless powers—demography & democracy." India currently has the world's largest young population, and the government under Prime Minister Modi is committed to harnessing its potential to the fullest.

The National Education Policy (NEP) of 2020 overhauled the existing education system after over thirty years. NEP envisions a paradigm shift in the Indian school and higher education system that is rooted in Indian ethos, is more learner-centric, and aims to make India a global knowledge superpower. In the last 11 years alone, a record number of new IITs, IIMs, medical colleges, and universities have been opened across the country. Along with education, skilling, and upskilling have also been the focus of the Modi government.

Since its launch, more than 1.6 crore youngsters have received skill training under the PM Kaushal Vikas Yojana, thereby improving their employment prospects.

The success of the Modi government's prioritization of creating new formal jobs for the youth can be seen in the massive rise in new Employee Provident Fund Organisation accounts. Consistent efforts to transform India into an attractive investment hub, assisting MSMEs and programs such as the Production Linked Incentive Scheme for domestic production have contributed towards creating employment opportunities for young Indians.

Rozgar Mela, a recruitment drive for 10 lakh Central government jobs, has been launched by the government. The youth are also being given an opportunity to serve in the Armed Forces under the Agnipath scheme. It will instill a fresh lease of 'Josh' and 'Jazba' in the Armed Forces, while at the same time bringing about a transformational shift towards a more tech-savvy force. The focus has not been just to create employment but also to build entrepreneurship, transforming the youth from job seekers to job creators.

Unlike earlier when people were risk-averse and opted for salaried jobs, the youth today is becoming enterprising because of the conducive policy environment. Through the Startup India programme that was launched in 2016, the Modi government has taken numerous measures to promote entrepreneurship by providing a host of tax benefits, easing regulations, and reducing the compliance burden.

Like entrepreneurship, sports was considered a distraction

for most young people, and they were discouraged from pursuing it professionally. However, PM Modi brought a crucial behavioural and mindset change and introduced various policies that have allowed innumerable youngsters to fulfil their dream of pursuing sports as a career. India saw its bestever performance in history during the Tokyo Olympics and Paralympics in 2021. This has been an outcome of long-term planning and support through the flagship Target Olympic Podium Scheme.

As India enters Amrit Kaal, its demographic dividend is uniquely poised to usher in an era of rapid social, economic, and technological innovation and advancement. The government in the last 11 years has been fully committed to supporting the youth in all its goals and endeavours.

Our goal is wellness and welfare for everyone. Our goal is physical, mental and social well-being.

- Narendra Modi

OVERVIEW

The benchmark of a dignified standard of living is to own a house with basic amenities such as tap water, cooking fuel, sanitation, electricity, and internet along with financial security through insurance, tax benefits, and easy access to public utilities. Since 2014, Prime Minister Narendra Modi's government has worked tirelessly to improve the quality of life of every Indian.

The Modi government in its endeavour to provide dignified life to all Indians has turned their dream of owning a house into a reality. The Modi government through its welfare programmes has ensured that citizens across all segments of society have access to basic facilities like banking, LPG connections, sanitation, electricity, tap water, affordable healthcare, and quality education. A reduction in interest rates and the Modi government's Credit Linked Subsidy Scheme under PM Awas Yojana has enabled people to buy their first home. Alongside this, strengthening the regulatory framework through steps such as the enactment of the Real Estate Regulatory Authority (RERA) Act 2016 has ensured that the lifetime earnings of citizens are protected by a legal framework that upholds the rights of homebuyers.

The Svamitva Scheme is a reformative step towards the establishment of clear ownership

of property in rural inhabited areas. It entails mapping land parcels using drone technology and providing a 'Record of Rights' to village household owners with the issuance of legal ownership cards (Property cards/Title deeds) to the property owners.

Lower taxation and affordable borrowing rates have led to massive savings for middle-class households and expanded their disposable income. Positive changes in income tax exemptions and direct tax reforms have reduced their tax burden and made tax filing simpler for the middle class. The Goods and Services Tax has led to a decline in a wide range of everyday expenses for consumers.

The Ude Desh Ka Aam Nagrik (UDAN) scheme, now in its sixth year, has made air travel affordable and convenient for the common man. It has provided air connectivity to numerous tier 2 and tier 3 cities and ensured that air travel is accessible to all. The number of operational airports in the country have doubled since 2014.

To ease transportation and daily commute for the urban citizen, a record number of metro rail projects have been approved and commissioned across several cities. Citizens are now shifting from private vehicles to public

transportation and making considerable savings without compromising on comfort.

The Digital Payment revolution unfolding in India has attracted global attention. In March 2025, approx.₹24.77 lakh crore worth of 1830.151 crore UPI transactions were carried out on the Unified Payment Interface (UPI). The (UPI) system is now used by close to 460 million individuals and 65 million merchants. Digital payments are being made for even the smallest of transactions, with nearly 50 per cent classified as small or micropayments. Taking India's digital transformation and connectivity to new heights, 5G has been rolled out in 99.6% districts of the country in 22 months, making it one of the fastest rollouts. It unlocks huge possibilities for India

The government through various measures in the last 11 years has focused on improving the daily life of its citizens. This momentum to improve quality of life for all Indians is in line with the larger vision of the Prime Minister of "Sabka Saath, Sabka Vishwas, Sabka Prayas."

POINTS TO REMEMBER

Taxes are no more a worry because...

- **E-filing** has become the norm.
- Refunds arrive in a matter of days, not months.
- Faceless assessments and appeals reduce harassment.
- Tax rates have actually reduced!

A trusted government, a trusting government

- Modi government has created an atmosphere of mutual trust.
- By taking steps like enabling selfattestation, the government has shown it trusts citizens.

• The increase in number of IT returns from 3.3 crore for FY13-14 to 8.09 crore for FY23-24 shows that the people trust the government to use their taxes appropriately/wisely.

Owning a house within everyone's reach, whether poor or middle class

- For the poor, there is PM Awas Yojana in both rural and urban areas
- 92.6 Lakh houses completed between 2015-25 under PM Awas Yojana and PM Awas Yojana 2.0 in urban areas
- **RERA** ensures timely delivery of homes,

so that the money of homebuyers is not stuck.

'Ease of Travel' and improved connectivity

- Expansion of metro rail is making local travel in cities much easier for urban residents.
- **UDAN** scheme has enabled affordable air travel and connectivity to many tier 2 and tier 3 cities.
- Car loan interest rates have fallen since 2014.

AFFORDABLE, ACCESSIBLE HEALTHCARE FOR ALL

6

OVERVIEW

Health and wellness have been a key focus area for the Narendra Modi government during the last eleven years. This has been the key element in India emerging victorious from a global pandemic, by administering over 220 crore doses of vaccines, as well as exporting a significant number of vaccines to the world in time of need.

Accessible and affordable quality healthcare, a priority for the government, has turned into a reality for the citizensof India. Previously, medical expenditure used to be a severe economic burden for low-income households and often led them into debt traps. In 2018, the Modi government launched Ayushman Bharat- Pradhan Mantri Jan Arogya Yojana, the world's largest health assurance programme, thus giving permanent relief from this burden to nearly 55 crore beneficiaries. Further, the Ayushman Bharat Digital Mission (ABDM) is realising the vision of building a digitally connected healthcare ecosystem.

Over 54 crore health records of individuals have been linked to their Ayushman Bharat Health Accounts (ABHA). The digitally available health records will enable the ABHA holders in availing paperless health services across the ABDM network. The government's telemedicine programme – eSanjeevani is bringing a revolution in the health sector of the country. Through it more than 37.15 crore beneficiaries have been able to access quality healthcare at their doorstep, thus bridging the urban-rural barrier in the provision of specialist medical care. 16000+ Jan Aushadhi

Kendras, located in almost all districts, are providing quality generic medicines at affordable prices to all.

The government has been committed to avoiding any suffering from vaccine-preventable diseases. In this regard, under various phases of Mission Indradhanush, 5.46 Crore Children and 1.32 Crore Pregnant Women have been vaccinated against 12 diseases. Due to this targeted government initiative, there has been a significant decline in Maternal Mortality Rate in the country from 130 in 2014-16 to 80 per lakh live births in 2020.

The Modi government has brought a crucial turnaround in medical education. Few government colleges, high fees in private medical colleges, and massive corruption in seat allocation had severely limited opportunities for medical education. In the last 11 years, the Modi government has approved/established new AIIMS in several States, and large number of new medical colleges. These include the first ever AIIMS in the Northeast in Assam. Further, the government's bold decision to replace the Medical Council of India with the National Medical Commission has ended corruption in medical education. In 'New India'. talented students from humble backgrounds can also fulfill their dream of becoming a doctor. India's quick and effective response to the Covid-19 pandemic was supported by its rollout of the world's largest vaccination drive and that too using indigenously developed vaccines. In a landmark shift

from the past, when the citizens had to wait for decades for the start of vaccination drives, PM Modi led government ensured administration of more than 2.2 billion doses of Covid vaccine in a short span of two years.

In the last 11 years, India has made huge strides in healthcare. A government that invests in healthcare invests in its people and thus the Narendra Modi-led government has truly been a government of the people, for the people, and by the people.

POINTS TO REMEMBER

Ahead of the curve, due to proactive leadership

- At a time when many world leaders failed to even recognise COVID-19 as a threat, even before India had a single case, screening began in airports.
- Long before many other countries took it seriously, in the first week of March 2020, PM Modi said he would avoid gatherings such as Holi Milan and set an example.
- Mask mandates were enacted in large parts of India long before the WHO called for them.
- At a time when many countries were only thinking of massive mortalities, in April 2020, India had already set up a vaccine task force to save lives.
- India started using Rapid Antigen Tests to speed up testing long before WHO recommended it.
- The fact that India went

into an early lockdown has been universally acknowledged. This helped ramp up medical infra.

Future-proofing India with PM-ABHIM

- PM Ayushman Bharat Health Infrastructure Mission to invest ₹64,180 crore on health infrastructure.
- Support for 17,788 rural health and wellness centres in 10 high-focus states.
- Establishing 11,024
 urban health and
 wellness centres in all
 states.
- 3,382 block public health units in 11 high-focus states.
- Setting up **integrated public health labs** in all districts.
- Establishing critical care hospital blocks in all districts with a population of more than 5 lakh.

Digital is the way - ABDHM

NATION FIRST: NATIONAL SECURITY & FOREIGN POLICY

7

OVERVIEW

Over the past eleven years, the Narendra Modi-led government has envisioned and executed a dynamic and transformative foreign policy that is outcomeoriented, development-focused, and aligned with the government's vision of "Sabka Saath, Sabka Vikas, Sabka Vishwas, and Sabka Prayas."

The primary focus of India's foreign policy remains its immediate neighborhood, under the 'Neighborhood First Policy.' This is further strengthened by the revitalized 'Act East,' 'Think West,' and 'Connect Central Asia' policies, aimed at enhancing India's engagement with its extended neighborhood. The government's vision of 'Security and Growth for All in the Region' (SAGAR) is designed to strengthen ties with like-minded partners to promote a rule-based order across the Indo-Pacific region.

New initiatives such as the International Solar Alliance (ISA), the Coalition for Disaster Resilient Infrastructure (CDRI), Lifestyle for Environment (LiFE), and the International Big Cat Alliance (IBCA) have strengthened our multilateral relations with the world. In keeping with the government's goal to expand India's global footprint around the world, proactive actions have also been taken to increase the number of missions, consulates. and representative offices. India took over the G-20 Presidency on December 1, 2022. The theme for India's Presidency, "Vasudhaiva Kutumbakam" or "One Earth-One Family-One Future," is a uniquely Indian concept that has been widely appreciated. More than 200 meetings held in 60 cities created an unprecedented atmosphere for the G20 event. As a result, India's G20 presidency was truly peoplecentric and emerged as a national effort.

Through the use of e-governance tools, India's consular operations have been made amongst the fastest, most transparent, and user-friendly globally. India has signed Social Security Agreements to protect the interests of Indian workers abroad, agreements to enhance mutual mobility of students, professionals, and agreements with several nations to prevent illegal migration.

India continues to play a pivotal role as the 'First Responder' during times of humanitarian crises. The setting up of the Rapid Response Cell as a specialized division in the Ministry of External Affairs to coordinate efforts during humanitarian crises has made disaster protocols more resilient. India has taken up several major relief and evacuation operations during the last 11 years such as Operation Dost (2023), Operation Ganga (2022), Operation Devi Shakti (2021), and Mission Sagar (2020), to name a few.

National security has remained a top priority for the Modi government. This can be seen in rescue operations conducted outside India, adopting zerotolerance against terror policy at home, as well as significant reduction in left-wing extremism. India's assertion on the global stage has also undergone a remarkable evolution. The success of **Operation SINDOOR** demonstrated a new India—

resolute, swift, and sovereign in action.

The Prime Minister's strong belief that development and national security go hand in hand has fueled the push for Aatmanirbharta (self-reliance) in defence. India's first indigenous aircraft carrier, INS Vikrant, showcases the country's growing prowess for indigenous manufacturing. Defence exports reached an all-time high of ₹23,622 crore in the financial year 2024-25. To foster innovation and technological advancement, the Innovation for Defence Excellence (iDEX) framework was launched, which has played a pivotal role in supporting startups and innovators for successful prototype development.

A dynamic foreign policy and national security policy is essential to respond to the opportunities and challenges of the world today. The Modi government has consistently delivered on this front, ensuring a stable, strong, and safe nation.

POINTS TO REMEMBER

Zero-tolerance to terrorism

- No major terrorist attack in Indian cities in non-conflict zones since 2014.
- Appropriate response to cross-border terrorism through Surgical Strikes in 2016, Air Strikes in 2019 and Operation Sindoor in 2025.
- Sponsors of terror have been globally isolated and cut to size.
- India has made terrorism a global issue and is leading global discussions on this issue.
- Strengthening legal framework through UAPA amendment.
- What is a positive indigenisation list and

why does it matter?

- Our positive Indigenisation lists of over 5000 items comprising major equipments have been issued.
- These lists contain a roadmap of those weapons, arms and systems that India will not import in future. 5 separate lists of over 4600 items for DPSUs have been notified.
- Knowing such a roadmap and mandate for domestic procurement helps domestic manufacturers ramp up production.
- This boosts India strategically and at the same time, creates jobs

for youth. Investment for Aatmanirbhar defence sector

- FDI limit in defence raised to 74% through automatic route.
- In Budget 2025-26,
 75% of the capital
 procurement budget for
 Defence is for domestic
 industry.
- Incentives for **defence corridors** in Uttar Pradesh and Tamil Nadu.
- Defence corridor in Bundelkhand of Uttar Pradesh will transform the poor region into a powerhouse.

INDIA, A GLOBAL ECONOMIC POWERHOUSE

8

OVERVIEW

The past few years have been challenging for the global economy as it recovers from the aftermath of the Covid-19 pandemic and the Russia-Ukraine conflict. As the world struggles to find its feet, the Indian economy continues to break new ground. In its latest projections on world economic growth, IMF recognizes India as the fastest-growing major economy in the world.

The substantial growth in GST collections, increased capital spending, and unparalleled export performance demonstrate a vibrant and resilient economy that has successfully recovered from the pandemic.

This has been possible due to the Modi government's holistic approach to managing the economic fallout of the pandemic, and also the steadfast efforts since 2014 to strengthen the economy. The structural reforms initiated by the Modi government have strengthened the Indian economy and enabled it to withstand the unprecedented effects of the pandemic. To make India self-reliant in manufacturing, the Modi government has initiated several programs under Aatmanirbhar Bharat as well as Make in India. This sector received further impetus

with the Production Linked Incentive (PLI) scheme. The objective behind PLI is to make domestic manufacturing globally competitive and to create domestic leaders in manufacturing. The PLI Schemes have created lakhs of jobs and placed the Indian economy on a rapid growth trajectory. From a net importer earlier, India has become a global manufacturing hub for mobile phones. The production of mobile phones increased by 5 times from about 60 million in 2014-15 to approximately 330 million in 2023-24.

The Modi government has made MSMEs a central focus of its economic policy. The government's Emergency Credit Line Guarantee Scheme during the Covid pandemic protected more than one crore MSMEs and saved them from possible permanent closure. Moreover, reforms such as revision of MSME definition have allowed MSMEs to expand their operations and grow.

PM Modi has consistently assured the country's wealth creators adequate support in their efforts towards innovation and making India self-reliant. This is reflected in his personal focus and support for the Indian Semiconductor Mission (ISM) and its vision of building a semiconductor

and display manufacturing ecosystem in India.

India has also emerged as a preferred investment hub under Prime Minister Modi's dynamic leadership. Consistent reforms such GST, IBC, in the FDI regime, ease of doing business, compliance reduction and signing multiple FTAs has resulted in consistent increase in both FII and FDI investments. Post COVID exports have touched new highs every year.

Over the past eleven years, the Indian economy has undergone a significant transformation, positively influencing the standard of living across all segments of society.

POINTS TO REMEMBER

World's fastest growing major economy – why growth is not just a number

- There is a global consensus that India will remain the world's fastest growing major economy.
- High growth will lead to **greater resources** for the government and allow further expansion of welfare schemes and infrastructure projects.
- High growth leads to the creation of new employment opportunities.
- New opportunities lead to a steady rise in incomes and distribution of benefits of growth to every section of society.

Aatmanirbhar Bharat: turning adversity into opportunity

• Robust economic management by PM Modi

since the pandemic started has turned adversity into opportunity.

- All economic indicators pointing towards India's economic resurgence.
- From MSMEs to MNCs, all firms have witnessed expansion in output and contributed to a historic rise in services, manufacturing and exports.
- Hiring sentiment at an all-time high in many sectors, ensuring growth converts to jobs.

Reforms by conviction and consensus

- PM Modi has started a new trend of reforms by conviction and consensus by personally pushing many structural reforms at a difficult stage.
- Cooperative federalism means the **Centre is**

- encouraging states to voluntarily undertake reforms, by incentivising them
- Reforms have protected the interests of all stakeholders

Building a better economy

- Introduction of Goods and Services Tax (GST) has led to greater formalisation.
- Sharp decline in NPAs and economic offences due to strict action by the government for recovering dues.
- IBC has salvaged the situation for the Indian banking and corporate sectors.
- India is rapidly transforming into a 'Digital Economy'.

* * *

Creating a base for 'Growthade'

- Indian corporates raised an all-time high of ₹1,62,387 crore through IPOs in 2024-25.
- National highways increased from 91,287 km in 2014 to 1,46,204 km till March 2025
- There are 160 operational airports in the country, which include 145 airports, 02 Water aerodromes and 13 Heliports as of March 2025.
- Extension for availing 15% tax rate for new manufacturing units till 2024, and tax incentives by a year for start-ups, will give a boost to sectors that have flourished in the last few years and created jobs
- Scheduled Commercial Banks (SCBs) gross non-performing assets (GNPA) ratio fell to a 12 year low of 2.6% in December 2024

MILESTONES

GLOBAL CONSENSUS ON INDIA'S RAPID GROWTH India to be the fastest growing major economy as per various global institutions.

There was a time when it was asked- Why India? Now after looking at the impact of the reforms that have taken place in the country, it is being asked - 'Why not India?'

- Narendra Modi

EASE OF DOING BUSINESS

9

OVERVIEW

Today the world is looking at India as an attractive destination for investment and global companies want to establish businesses here. There is wholesome appreciation for Prime Minister Narendra Modi's thrust for transformative governance and economic reforms to enhance the Ease of Doing Business in India. One of the most striking indicators of the country's improved business environment is the growth of its startup ecosystem. One of the greatest examples of improvement in the business climate of the country can be seen in its startups. Before 2014, India had a few hundred Startups. More than 1,60,000+ Recognized startups have been added, creating 17.6 lakh+ jobs in last 11 years. Moreover, India is the 3rd largest start-up ecosystem in the world.

Since 2014, rent-seeking and red-tapism have been replaced by a red carpet. The government is not an obstacle in the path of risk-takers but is an active enabler. Entrepreneurs and investors in India are now delighted by a business-friendly environment and a government that actively addresses their concerns and redresses grievances. This paradigm shift has been made possible through landmark decisions such as removing retrospective taxation, and Angel Tax, and lowering corporate tax. The

National Single Window System now allows obtaining all approvals through a single platform. Moreover, the Modi government has reduced unnecessary compliance burden by repealing more than 1,500 archaic laws and thousands of compliances. These used to create unnecessary costs and hurdles for Indian enterprises.

The Prime Minister's mantra of transparency and reduced compliance requirements proves that the government trusts its citizens. This trust is reflected in the increasing number of taxpayers and record tax collections. Similarly, increasing self-regulation, self-certification, automated random labour inspections, and faceless tax assessment/appeal has not only weakened the 'Inspector Raj' but also enhanced compliance.

India's efforts to improve the ease of doing business are being acknowledged on the global stage. This is evident in consistent improvement in various international rankings. For instance, the country's ranking in the World Bank's Ease of Doing Business Index climbed from 142 in 2014 to 63 in 2019. India has climbed six places on the World Bank's Logistic Performance Index (LPI) 2023, now ranking 38th in the 139 countries index.

This is a strong indicator of India's global positioning, with this development being powered by the Government's laser focus on reforms for improving logistics infrastructure through initiatives like PM Gati Shakti and new National Logistics Policy.

The thrust towards greater transparency & a level-playing field for MSMEs and small businesses is exemplified by the success of the GeM portal, the government purchases have crossed ₹5 lakh crore.

Apart from numerous reforms and landmark decisions, Prime Minister Narendra Modi has successfully led a mindset transformation. Unlike previous governments, the Modi government not only considers entrepreneurs as wealth creators but also as partners in national development. Concerted efforts to improve the Ease of Doing Business have led to a historic expansion in the pool of wealth creators. This has had a butterfly effect on the country at large- it has increased resources available to the government for its welfare and development programmes, while at the same time enabling job creation, and higher incomes in the country.

* * *

AT A GLANCE E

from 5,978 in 2014-15 to

1,03,057 in 2023-24

National Single Window System has ensured

easier compliance

POINTS TO REMEMBER

Painless, faceless, seamless tax system

- Tax rates are not a pain anymore. India has one of the lowest corporate tax rates of 15% for new domestic manufacturing companies.
- For existing companies, the government reduced corporate tax rates from 30% to 22%.
- Retrospective tax adversely affected India's image among global investors and has accordingly been scrapped. Similarly angel tax has also been scrapped.
- Most tax processing and assessments happen online, which makes filing returns, assessments, appeals and

refunds seamless and quick.

• Faceless assessment and appeals remove chances of harassment, reducing inspector raj.

From red-tapism to red carpet

- Various economic reforms and incentives have made India the most preferred destination for investment.
- Single window system is available for approvals and clearances, reducing hassles.
- The number of documents needed for company incorporation has been reduced.
- FDI rules have been liberalised in many

sectors and hence, FDI has broken all records in the past few years.

Trust in industry and entrepreneurs

- The 'Growth Ambassadors' of India, our entrepreneurs are powering India's growth story by creating jobs.
- A new mindset of trust has been created where the government and citizens trust each other.
- Self-regulation and Self-compliance are the norm.
- Ending 'Inspector Raj', reforms in labour inspection processes and environmental laws have curbed rent seeking and corruption.

- Narendra Modi

INFRA AT SPEED AND SCALE

10

OVERVIEW

The quality of a country's infrastructure is a key determinant in shaping its economic trajectory. Quality infrastructure is the key building block for our nation to become a global economic powerhouse. Keeping this in mind, the Narendra Modi-led government has kept infrastructure at the front and centre of its development agenda.

In the past, infrastructure projects suffered from inordinate delays. But in the last eleven years, thinking big and delivering without delay have been the hallmarks of infrastructure development in the country. The Prime Minister has regularly monitored the progress of projects through the PRAGATI platform, which has led to the successful completion of various delayed, as well as newly announced infrastructure projects.

In line with its goal of bringing last-mile connectivity, the daily average highway construction reached an all-time high and has consistently remained far higher than pre-2014 levels. Similarly, a rapid increase in the construction of rural roads has made access to

roads nearly universal in the hinterland. Indian railways also witnessed a massive capacity expansion in the last 11 years through line doubling and electrification of railway tracks. The Vande Bharat Express, India's first indigenous Semi High-Speed trains are a 'Make in India' success story. As for air travel, the steps taken by the Modi government, have made it affordable and accessible. 86 airports have been built and operationalised in just 11 years. Further, 88 underserved/unserved destinations which include 73 Airports, 13 Heliports & 2 Water Aerodromes have been connected under the UDAN scheme.

Like airports, metro rail also is no longer limited to big cities. In the last 11 years, metro rail projects have reached 23 cities.

To further enhance infrastructural linkages, and reduce costs for citizens, the recently launched National Logistics Policy aims to bring down logistics costs, give a fillip to international trade, present new opportunities to our startups, businesses, and farmers, and usher in prosperity in the nation.

Infrastructure development in a country has to be supported by strong financial commitments. In line with this, Prime Minister Narendra Modi announced the PM Gati Shakti National Master Plan (NMP) which is a transformative approach for integrated and holistic planning across concerned Ministries/Departments to improve multimodal connectivity, logistics efficiency and to address critical infrastructure gaps for seamless movement of people and goods, with focus on minimising disruptions and ensuring timely completion of projects. It is the most extensive plan for infrastructure development in the history of independent India, as the government plans to invest nearly ₹100 lakh crore in the coming years.

Prime Minister Narendra
Modi's vision for
infrastructure development
will support India's economic
growth to the next level.
It will enhance the ease of
living for citizens, multiply
job creation and achieve the
last mile connectivity to bring
about inclusive development.

We are creating modern digital infrastructure in India. Along with this, we are also ensuring that the benefits of digital revolution reach every section of the society.

- Narendra Modi

INDIA'S TECHADE

11

OVERVIEW

The Modi government has shown an unwavering commitment to use technology for inclusive development and to promote ease of living. The government is working at democratising technology and bringing rapid digitalisation of governance.

A remarkable success story is evident in the popular adoption of digital payments in the country. In March of 2025, about 18,301.51Mn (1830 crore) transactions worth ₹24.77 lakh crores approximately were carried out on the United Payment Interface. India's digital payment system has been linked to various countries globally. Aadhaar e-KYC services also continue to play a stellar role for banking and non-banking financial services by providing transparent and improved customer experience, and helping in ease of doing business. India today has amongst the highest fintech adoption rates in the world.

In the last eleven years, there has been a meteoric rise in mobile ownership across India. The sharp decline in the cost of data has led to deep penetration of the internet, bridging the urbanrural divide. With 5G rollout in 99.6% districts of India, the country will witness the next wave of digital transformation

and connectivity. Under the Bharat Net project, more than 2.14 lakh of the 2,50,000 Gram Panchayats in the country have already been provided with Broadband connectivity.

Technology adoption by the government over the last eleven years has ensured a remarkable increase in transparency in governance. Today, all government programmes have a digital dashboard that provides all details of beneficiaries. Digital delivery of public services is eliminating corruption and promoting ease of living.

Digital delivery of vaccines through the CoWIN platform allowed India to ensure equity and accessibility in vaccine distribution. Other countries are now looking towards India for providing technology solutions such as the CoWIN platform.

The Modi government has effectively deployed technology and digital tools for ensuring transparency and plugging leakages in governance. For example, the introduction of Direct Benefits Transfer and Aadhar authentication in various welfare schemes have led to the elimination of lakhs of ghost beneficiaries, enormous savings for the government, and timely delivery of benefits

to citizens. Between 2015 and March 2023, the government saved more than ₹3.48 lakh crore due to the distribution of benefits through DBT.

Even public procurement, a common avenue for bureaucratic corruption earlier, has now become digital as the Government e-Marketplace (GeM) portal is being utilized by government departments and PSUs for their procurement. The portal is successfully eliminating corruption and streamlining public procurement in the country.

In the last 11 years, India's space programme has grown from strength to strength.

While its various Missions are talked about widely with the recent launch of Vikram-S, India's first-ever private launch vehicle, India is now ready to enter a new decade of further innovation, and advancement in this sector.

India's foray into the vast expanse of space has been nothing short of remarkable, capturing the imagination of the world and showcasing the nation's commitment to scientific exploration and technological innovation. The Indian Space Research Organisation has steadily evolved into a global space powerhouse with the objective of enhancing the overall progress of India through the most effective and efficient utilisation of space sector applications.

This transformation has been made possible through unwavering government support that has consistently nurtured and propelled India's space missions to new heights.

Under the visionary leadership of Prime Minister Narendra Modi, the importance of space exploration as a catalyst for national development has been recognized. His tryst with the space sector began when he was the Chief Minister of Gujarat. His vision ensured that space sector applications were translated into solutions for effective governance. The same technology is being leveraged in PM Gati Shakti, where space technology is extensively used for planning and executing infrastructure projects seamlessly. Only visionary leaders can understand that space technology and exploration are keys to unlocking mysteries in space and accelerating effective governance on Earth.

"India is on the Moon. We have our national pride placed on the Moon. We reached the spot where no one had ever reached before. We did what no one had ever done before. This is today's India, fearless India, warrior India."

- Prime Minister Narendra Modi, 23rd August 2023

PM Modi highlighted that, India's successful moon mission is not India's alone, it is India's human-centric approach that has been welcomed universally and our moon mission is also based on the same human-centric approach and hence this success belongs to all of humanity.

PM Modi is confident that all countries in the world, including those from the Global South, are capable of achieving such feats and like India all can aspire for the moon and beyond.

Chandrayaan 3

Big Bang Moment for ISRO and India

- First country to reach lunar south pole.
- · Fourth country globally to reach moon.
- 23rd August declared as the National Space Day celebrating Chandrayaan 3 landing.
- ·Laser-Induced Breakdown Spectroscope (LIBS) instrument onboard the Rover Pragyan unambiguously confirms the presence of Sulphur (S) in the lunar surface near the south pole.

- Narendra Modi

NORTHEAST: A GROWTH ENGINE

12

OVERVIEW

The Narendra Modi-led government has always prioritized inclusive development, and the government's Northeast policy reflects its push to bring the region into the mainstream.

This policy emphasises not only economic growth and internal security but also the protection and celebration of the region's unique cultural identity.

Over the last 11 years, Delhi itself has reached the doorstep of the Northeast through regular visits by the Prime Minister, his ministerial colleagues, and senior bureaucrats. The Prime Minister has himself become an ambassador of the Northeast culture for the rest of the country and the world.

In the last 11 years, significant investment has been made in the Northeast for its economic development. Several projects have been completed during the last 11 years. 974 industrial units registered under Northeast Special Infrastructure Development Scheme (NESIDS). ₹1010.99 Crore disbursed till 31.03.2025: ₹400 Crore disbursed alone in 2024-25 for developmental packages in the Northeastern Region. The Prime Minister's Development Initiative for Northeast Region (PM-DevINE) announced as part of the Union Budget 2022-23, aims at rapid and holistic development of the region by funding projects of significant impact.

Lack of physical connectivity and poor infrastructure had contributed to the region's isolation for many decades. Innumerable long-pending infrastructure projects were completed. The long list of projects includes iconic projects such as Bogibeel Bridge, inaugurated by PM Modi in 2018, sixteen years after its announcement by PM Atal Bihari Vajpayee, expansion of the railway network, the trial run of passenger train has been conducted in Mizoram first time since independence. The government has also focused on operationalizing new airports in the region, as well as setting up new medical colleges, including the region's first AIIMS. The impact of the improved connectivity can be seen in the increasing tourist numbers in the region.

Northeast had faced severe internal security challenges for decades. Due to the effective steps taken by the Modi government, there has been a significant improvement in the security situation in the Northeast. Since 2014 there has been sharp reduction in the extremist incidents and the resulting deaths of security personnel and civilians. The signing of peace accords has led to peace and a decline in violence in the region. These

efforts have paved the way for reducing AFSPA coverage in the region. Long pending disputes between States in the Northeast had been a major concern in the region. Many decades-long disputes are finally getting permanently resolved through the active efforts of the Modi government. Recently Assam and Arunachal Pradesh have signed a Memorandum of Understanding to resolve a decades-old dispute over the shared boundary of the States.

The landmark decision to declare Bamboo as grass and the launch of the National Bamboo Mission gave a fresh impetus to the production of Bamboo-based products in the region. On numerous occasions, Prime Minister Narendra Modi has highlighted the success of Sikkim in promoting organic farming and becoming the world's first 100% organic State. From being on the margins of the India story, the Northeast is quickly becoming one of the country's growth engines.

POINTS TO REMEMBER

Taking Delhi to the doorstep of the Northeast

PM Modi has visited the Northeast at least 70 times. This is a record for any Prime Minister. When he shows his priorities through such actions, the whole government machinery understands the importance of this region.

Peace for Progress

- Framework Agreement with NSCN(IM), 2015
- Tripura Peace accord, (NLFT/SD) 2019
- Bodo Peace Accord, 2020
- Bru Rehabilitation Agreement, 2020
- Karbi-Anglong Peace Accord, 2021
- Assam-Meghalaya boundary agreement, 2022
- Adivasi Assam Peace Accord, 2022, DNLA Peace agreement 2023, ULFA Peace Accord 2023, NLFT and ATTF
- Peace Agreement 2024 Peace accords have

- reduced violence considerably in the region.
- Significant drop in insurgency and civilian deaths.
- Decades long border disputes finally getting resolved amicably.

The track to growth

- The Modi government is steadily bringing all parts of the Northeast on India's railway map.
- Three state capitals— Assam, Tripura and Arunachal Pradesh – are connected by broad gauge rail.
- Work on connecting

- other state capitals is on track.
- Reducing travel time between Northeast and other states improves economic opportunities.
- Connectivity will enable commerce and the sale of goods produced in the Northeast across the country.
- Economic activity will reduce migration for employment and fuel further development.

Assam will have South Asia's largest cancer care network with 15 hospitals.

8 have been inaugurated already and 7 more are under construction.

8 cancer hospitals are being built in Phase 1 in Dibrugarh, Kokrajhar, Barpeta, Darrang, Tezpur, Lakhimpur, Jorhat and Itanagar.

In Phase 2, seven new cancer hospitals will be built at Dhubri. Nalbari, Goalpara, Nagaon, Sivasagar, Tinsukia, and Golaghat.

One cancer hospital is also being built in Itanagar, Arunachal Pradesh.

It has been the constant endeavour of the Prime Minister Narendra Modi to honour the unsung heroes in a befitting manner. In line with this, the country celebrated 2022 as the 400th birth anniversary of Lachit Borphukan. Lachit Borphukan (November 24, 1622 — April 25, 1672) was the famous General of the Royal Army of the Ahom Kingdom of Assam who defeated the Mughals and successfully halted the ever-expanding ambitions of the Mughals under Aurangzeb. He inspired the Assamese soldiers in the Battle of Saraighat, fought in 1671, and inflicted a crushing and humiliating defeat on the Mughals

The Donyi Polo Airport is becoming a witness to the history and culture of Arunachal Pradesh

Advantage Assam 2.0

- The two-day Advantage Assam 2.0 Investment and Infrastructure Summit 2025 was held in Guwahati, Assam
- The Rising North East Investors Summit 2025 attracted ₹4.3 lakh crore in investment interest.
- Over 80 countries participated, showing strong international engagement.
- Leading investors pledged ₹1.55 lakh crore across sectors like agriculture, digital services, and infrastructure.
- Extensive outreach included 9 roadshows, Ambassadors' Meets, and sectorspecific interactions.
- PM Modi highlighted ₹21,000 crore invested in Northeast's education 800+ new schools, AIIMS, medical colleges, and IIITs.
- The summit marks a New Economic Revolution positioning the Northeast as India's gateway to Southeast Asia.

It is rich Indian
heritage that transcends tests of
tide and times. It embraces the
new. And hence we should be
proud of this heritage.

- Narendra Modi

VIRASAT AUR VIKAS

13

OVERVIEW

Prime Minister Narendra Modi has placed strong emphasis on giving India's rich civilisational history and culture the recognition they deserve. After decades of neglect, various historically significant sites have been restored and revived under his leadership. The transformation of Varanasi through projects like the Kashi Vishwanath Corridor has transformed its narrow lanes, ghats, and temple areas. Similarly, initiatives such as the Mahakaal Lok Project in Ujjain and the MaaKamakhya corridor in Guwahati aim to enhance the spiritual experience for devotees by offering state-of-the-art facilities while also boosting tourism and strengthening the local economy.

The 900 km long Chardham road project will provide seamless all-weather road connectivity to the four holy Dhams. PM Modi personally monitored the progress of redevelopment projects in Kedarnath, a temple extremely close to his heart. The newly unveiled statue of Adi Shankaracharya in the Kedarnath complex will be an eternal symbol of civilizational and cultural unity across regions. In August 2020, PM Modi participated in the Bhoomipujan for the Ram Mandir in Ayodhya, a memorable moment in the history of modern India.

To remove any trace of the colonial mindset, the PM inaugurated the 'Kartavya Path' which symbolised a shift from erstwhile Rajpath being an icon of power to Kartavya Path being an example of public ownership and empowerment. Bringing back the nation's lost heritage has been a priority for the Modi government. Over centuries, innumerable priceless artefacts had been stolen and smuggled abroad. The Modi government adopted a proactive

approach for 'bringing back our gods'. On numerous foreign visits, PM Modi discussed this matter with global leaders and multilateral institutions. Several priceless antiquities have been brought back to India in the last 11 years.

The Modi government has extended special recognition to nation-builders. The Statue of Unity in Gujarat, the world's tallest statue, has not only put Kevadia on the global tourism map but also become a way of remembering the Iron Man of India. Projects such as revamp of the Jallianwala Bagh complex and the development of sites related to Dr. B.R. Ambedkar as 'Paanchteerth' will etch the sacrifices and achievements of our nation-builders and freedom fighters in public memory. The Modi government has given recognition to all national heroes irrespective of their politics or ideology. A statue of Netaji Subhash Chandra Bose has been unveiled on India Gate to honour and celebrate his heroic legacy.

The newly inaugurated Pradhan Mantri Sangrahalaya, a museum in Delhi celebrating the lives and contributions of all Prime Ministers of India also bears a testament to the non-partisan recognition of all national heroes.

In 2019, Prime Minister Narendra Modi inaugurated the National War Memorial in New Delhi which remembers those who made the supreme sacrifice for the country. Though it had been under consideration since 1961, not much progress was made in this crucial project. Prime Minister Narendra Modi gave the muchneeded momentum to this project and work started after approval in 2015.

India walks shoulder to shoulder with rest of the world when it comes to adopting the best practices and taking initiatives to highlight its culture combined with a modern outlook. India's cultural diversity has long generated international curiosity. A traditional drama like Abhigyan-Shakuntalam exists alongside an epic like the Mahabharata. Every atom has been transformed into a fantastic universe of folklore and tradition. The combination of history and technology with entertainment has resulted in the creation of the world's most amazing economic market, known as the Orange Economy. The World Audio Visual and Entertainment Summit (WAVES) was held in India for the first time to position India as an important player in the world's rapidly rising economy. The mega event held in Mumbai in May 2025 showcased the power and vibrancy of Indian art. culture. and content to the world.

'Kashi Tamil Sangamam' (KTS) 1.0 and KTS 2.0 were organised in Varanasi in November 2022 and December 2023 respectively. KTS 3.0 was organised in February 2025 in three cities (Ayodhya, Praygraj and Varanasi in line with Maha Kumbh).

The objective of the programme was to celebrate, realm and rediscover the age-old links between Tamil Nadu and Kashi – two of the country's most important and ancient seats of learning. The Modi government has left no stone unturned to celebrate the idea of Ek Bharat Shreshtha Bharat, which aims to celebrate cultural diversity of the country.

POINTS TO REMEMBER

IN THE FOOTSTEPS OF LOKMATA AHILYABAI HOLKAR

Lokmata Ahilyabai Holkar, one of the greatest queens, is still remembered for rejuvenating temples. PM Modi is following in her footsteps!

	Lokmata Ahilyabai Holkar	PM Modi
	Built the present Kashi Vishwanath Temple in Varanasi	Developed the Kashi Vishwanath Corridor around the temple
	Revamped famous ghats of Varanasi	Ghats cleaned; Ganga pollution reduced through Namami Gange
	Refurbished Sarayu Ghat in Ayodhya	Construction of Bhavya Ram Mandir
	Rebuilt Juna Somnath Temple	Development works around the Somnath temple, building Parvati Mandir

Unlike leaders of the past, PM Modi wears his culture on his sleeve

- PM Modi has never shied away from giving our culture its due respect.
- The government, too, works to promote India's culture and values.
- In the gifts that PM Modi gives to dignitaries, and the places world leaders visit in India, our cultural heritage is highlighted.
- He has also made proactive efforts to ensure the return of stolen antiquities and artefacts.

From Somnath to Kedarnath, from Ayodhya to Ajmer, from Varanasi to Velankanni

- Modi government considers it a duty to preserve sites of importance, irrespective of region or religion.
- While PM Modi's work in Somnath, Ayodhya, Kedarnath, etc, are well known, places of every religion are being developed

- under PRASHAD scheme.
- Upgrade of Cheraman Juma Mosque, Hazratbal, Ajmer, St Thomas Shrine and Velankanni has been taken up.
- St Luke's Church in Kashmir was renovated and reopened after 3 decades.

Honouring India's greats

- Statue of Unity honours Sardar Vallabhbhai
 Patel's contribution to creating a united India.
- Netaji Subhas Chandra Bose's legacy being honoured: On the occasion of the 125th birth anniversary celebrations of Netaji Subhas Chandra Bose, a multi-media exhibition- Nirbhik Subhas and 3D projection mapping show on Netaji was inaugurated by Hon'ble PM of India Shri Narendra Modi on 23 January, 2021. He also unveiled a book "Letters of Netaji" and commemorative coin and

- stamp in the memory of Netaji Subhas Chandra Bose. A statue honouring him was unveiled at India Gate.
- Mahatma Gandhi's legacy carried forward through Sabarmati Ashram redevelopment.
- Panchteerth brings
 Dr. Babasaheb Ambedkar
 to the centre of India's
 discourse and recognizing
 his contributions.
- Jallianwala Bagh
 memorial's uplift helps
 make memories of the
 freedom struggle relevant to
 future generations.
- 11 Tribal Freedom Fighter Museums being developed.
- No political bias in recognizing and respecting nation builders. Neither one person, nor one party, but a museum for all Prime Ministers at PM Sangrahalaya.

WAVES 2025: Shaping the Future of Innovation and Media

- The first ever global convergence summit of the world in Media and Entertainment Sector World Audio Visual Entertainment Summit WAVES held from 1st to 4th May, 2025 was inaugurated by Prime Minister in Mumbai.
- The summit witnessed participation of delegates from over 100 countries and saw cumulative footfall of over 1 lakh visitors. More than 1,000 global and Indian M&E companies participated.
- WAVES declaration adopted by 77 countries.
- Over 140 sessions featured more than 100 international speakers, including plenary sessions featuring over 50 keynote addresses by eminent personalities.
- The WAVES Bazaar facilitated business deals and discussions worth more than ₹1,300 crore. The Government of Maharashtra signed MoUs totaling ₹8,000 crore at WAVES 2025.
- Under WAVEX 30 M&E startups from Tier 1 and Tier 2 cities pitched their unique ideas directly to 45 big investors. More than 500 startups showcased their activities.
- MoUs signed with industry leaders like Adobe, Google, and NVIDIA to transform IICT into a world-class institution.

WORLD AUDIO VISUAL & ENTERTAINMENT SUMMIT

India is committed to furthering sustainable development in line with our culture of living in harmony with nature.

- Narendra Modi

ENVIRONMENT AND SUSTAINABILITY

14

OVERVIEW

The Atharva Veda says, 'The Earth is our Mother and we are her children'. Indian philosophy and lifestyle have always been rooted in the concept of coexistence with nature.

Over the last 11 years, under Prime Minister Narendra Modi's leadership, India has emerged as a global leader in the fight against climate change.

When PM Modi took over in 2014, India was globally seen as a roadblock in climate negotiations. However, the Prime Minister has given solutions to forge a path forward. Since COP21, the Prime Minister's principle of climate justice has ensured that equity concerns aren't ignored in climate change negotiations. India has remained focused on providing a 'fair deal'.

At COP26 in Glasgow, the Prime Minister introduced the idea of LiFE. India believes that climate action starts at the individual level and Prime Minister Modi has provided a simple solution to the complex problem of climate change.

There has been a significant increase in forest cover in the country. Over the past decade, the tiger population in India has more than doubled and today India is home to 75% of the world's tiger population.

Further the inter-continental translocation of African cheetahs has provided a boost to India's wildlife diversity. In 2023, after 70 years, cheetah cubs were born in India as the wildcat had previously become extinct in the country.

While many countries fail to fulfill their climate targets, India has hit targets long before deadlines. For example, the target for achieving 40% of installed electricity capacity from nonfossil sources, which was set at COP21, was fulfilled ten years ahead of schedule. Targets set for Ethanol Blended Petrol under the National Policy on Biofuels were also achieved 5 months ahead of schedule.

The Namami Gange programme has successfully arrested pollution of the holy river and improved water quality at numerous locations. This cause has been extremely close to PM Modi's heart, as evident in his decision to donate all proceeds from an auction of gifts he received to the Namami Gange programme. The last 11 years have witnessed a rapid transition towards renewable sources of energy. Numerous incentives for the renewable energy sector and lower cost of inputs have led to a massive decrease in renewable energy tariffs.

Further, the UJALA programme has led to thousands of crores of

savings while reducing carbon dioxide emissions.

Meanwhile, as part of its global leadership in promoting clean and renewable energy, India under PM Modi championed and led the formation of the International Solar Alliance.

The newly launched National Green Hydrogen Mission aims to make India energy independent, as well as a hub for the production and export of green hydrogen. From cleanliness to avoiding single-use plastic, the Prime Minister has often encouraged citizens to make lifestyle changes to contribute to the environment. By transforming these causes into mass movements, he has ensured impact at scale rather than a temporary shift in public habits.

According to Prime Minister Modiour planet is one but our efforts have to be many - One earth, many efforts. India stands ready to support any effort for a better environment and to further global wellness.

POINTS TO REMEMBER

Ensuring sustainable development

- Modi government has demonstrated that development can go hand-in-hand with environmental protection.
- Environmental law reforms under PM Modi have led to both better compliance and ease of doing business.

India is shaping the global climate change debate

- Unlike the past, India is now a leading voice in climate change negotiations.
- India has made 'climate justice' central to global climate change discourse.
- PM Modi's 'Panchamrit' and 'LIFE - Lifestyle For

Environment' initiatives highlight India's position as a global role model in countering climate change.

- GOBARdhan is a Waste to Wealth initiative in tune with the circular economy and Mission LiFE initiatives of GoI, launched on 30 April, 2018 as a part of SBM-G.
- Beneficiaries of GOBARdhan projects from biogas and sale of bio-slurry are industries/ entrepreneurs, rural households, farmers, SHGs, Gaushalas, Gram Panchayats.
- GOBARdhan ensures scientific management of bio-waste, resulting in cleanliness in villages and generation of wealth

and energy by converting cattle dung and solid agricultural waste into compost and biogas.

Transformation of India's green landscape through Jan Bhagidari

- Big targets and speedy achievement have been hallmarks of India's renewable energy policy.
- Since 2014, there has been a 41-fold increase in solar energy capacity.
- PM Modi has encouraged people's participation in environmental protection.
- From Swachh Bharat to the end of single-use plastic, he has motivated citizens and brought a voluntary change in everyday habits.

* * *

Did you know?

At the COP26 Summit in Glasgow, PM Modi pitched for a 'one-word movement' before the world in the form of 'LIFE' which stands for 'Lifestyle for Environment'

The Prime Minister called upon the world to make 'Lifestyle for Environment' i.e. LiFE a global mission to fight climate change. The vision emphasizes not only energy production but also energy conservation and sustainable living. These solutions include energy-efficient ACs, geysers, heaters and ovens.

MILESTONES

- Launched by PM Modi, International Solar Alliance envisions mobilising \$1 trillion in solar investments by 2030
- In 2014, India had 26 Ramsar sites. In last 11 years, India has significantly increased its commitment by adding 59 new Ramsar sites

Namami Gange programme launched in 2014 as a flagship initiative

- · So far, a total of 494 projects have been sanctioned at an estimated cost of ₹40,481 crore; 315 projects have been completed and made operational.
- Increase in Sewage Treatment Plant capacity has led to a cleaner river.
- Aquatic species like dolphins are returning.
- Millions of litres of pollutants that used to be dumped into the river stopped.
- . The proceeds from the auction of PM's momento is pledged to the Namami Gange Project

The story of India's massive renewable energy push

PM Modi promised the world that India would hit 500 GW non-fossil fuel based power capacity by 2030.

Ambitious? But India is already setting record pace.

Non-fossil fuel based power is 49.1% of total installed capacity.

(as on April 2025)

India's installed clean energy capacity grew a whopping

2.9 times since 2014! (as on April 2025)

As of March 2014

76.38 **GW**

was India's installed clean energy capacity.

In just 11 years, it has been almost tripled to

228.28 GW

(as on April 2025)

Here's how India is an emerging global leader in renewable energy!

- India now has the **4th largest** clean energy capacity in the world.
- India has the **4th largest** installed wind energy capacity.
- India has the **3rd largest** solar installed capacity.

The Renewable Energy Country Attractiveness Index ranks countries on attractiveness of investment and deployment opportunities.

India is leading by example

Achieved COP21 target of 40% energy from non-fossil fuel sources, sources, nine years ahead of schedule. India remains in track to fulfill the SDGs.

Bringing A Global Transformation

PM Modi spearheaded the global initiative to form the International Solar Alliance, which currently has 105 member countries and 18 signatory countries.

One Year Achievements of Modi 3.0

At a glance

Guaranteed Income via MSP

Over ₹2.44 lakh crore to be disbursed through MSP for wheat and paddy procurement, ensuring stable income and price security for farmers.

Makhana Board – Boosting Bihar's Superfood

Board to be set up in Bihar for makhana promotion. Focuses on production, processing, and marketing to empower farmers and promote healthy snacking options.

Empowering Tribes, Transforming Villages

Dharti Aaba Janjatiya Gram Utkarsh Abhiyaan, launched on 2 Oct 2024. Abhiyan aims at saturation of more than 6300 tribal majority villages with budget of ₹79,156 crore, benefitting 5 crore people.

Mission for Aatmanirbharta in Pulses

Special national mission focusing on Tur, Urad, and Masoor to enhance domestic production and reduce import dependency for nutritional and strategic food security.

PM Dhan Dhaanya Krishi Yojna

100 low-productivity districts to benefit under the new scheme announced in Budget 2025–26, empowering 1.7 crore farmers through focused productivity and credit-based support.

Jal Jeevan Mission (JJM)

JJM budgetary outlay enhanced to ₹67,000 crore. Mission extended till 2028 with an aim to achieve 100% tap water connections in rural areas. 15.62 crore rural households are benefitting from the mission.

Rural Power Supply

In 2025, rural areas are consistently receiving an average of 22.6 hours of electricity daily, maintaining steady access to power.

Affordable Urea for All

Urea continues to be supplied at unchanged statutorily notified MRP since March 2018, ensuring affordability and support for Indian farmers amid input cost challenges.

Suposhit Gram Panchayat Abhiyaan

A mission to eliminate malnutrition and improve nutrition outcomes by promoting grassroots participation at the Gram Panchayat level.

Jan Aushadhi Kendras: Affordable Healthcare for All

With 16,000+ stores as of March 2025, Jan Aushadhi Kendras offer quality generic medicines at 50-90% lower prices, making healthcare affordable and accessible across India.

Gateway to Global Trade: Vadhavan Port Rising

India's largest container port is being developed at Vadhavan, Maharashtra, with ₹76,000 crore investment—poised to enhance maritime logistics and boost India's global trade and economic growth.

Bridging History and Innovation: Pamban Rail Reborn

India's first vertical lift sea bridge, the historic Pamban Rail Bridge, was inaugurated on 6 April, 2025. A marvel of engineering, it boosts connectivity to Rameswaram.

Vande Bharat in the Valley: Jammu–Srinagar Rail Dream Nears

The Jammu–Srinagar Vande Bharat Express, under the USBRL Project, is set to begin soon, promising faster, modern rail travel across the picturesque Kashmir valley, CRS clearance granted.

Wings to Bharat: UDAN 2.0 **Soars Higher**

The modified UDAN scheme targets 120 new destinations and 4 crore passengers over 10 years, boosting connectivity through helipads and smaller airports in hilly and NE districts.

A New Era in Aviation

Bharatiya Vayuyan Adhiniyam, 2024 aims to modernize India's aviation sector in line with contemporary needs and global standards. The new legislation will foster indigenous manufacturing under Make in India and Atmanirbhar Bharat initiatives. The Adhinivam removes redundancies and provides provisions for appeals.

₹1 Lakh Crore **Urban Challenge Fund: Boosting Cities as Growth Hubs**

A ₹1 lakh crore Urban Challenge Fund launched to transform cities into dynamic growth hubs, driving sustainable urban development and economic progress across India's metropolitan areas.

Cyber Surakshit Bharat & Aadhaar: Securing and Empowering Digital India

Cyber Surakshit Bharat initiative for strengthening cybersecurity of govt. officials, CSC welfare Camps for traders & citizens. 3 batches of CISO Deep Dive training programmes conducted; 88 CISOs/CTOs and other senior government officials trained Aadhaar powers India's digital leap.

With 210 crore Aadhaar transactions, 37.3 crore e-KYC transactions and 14 crore face authentications in April 2025, has historically transformed the digital landscape.

Caste Data for Inclusive Growth

The Cabinet approved caste enumeration in the upcoming census to ensure accurate data for policymaking. This is the first such official exercise since 1931, aiming for transparency and inclusivity.

National Mission on Edible Oils - Oilseeds

Cabinet approves National Mission on Edible Oils - Oilseeds (NMEO-Oilseeds) for 2024-25 to 2030-31. It aims at making India self reliant in seven years in oilseeds' production.

PM - Vidyalaxmi Scheme: Financial support to meritorious students

The scheme will facilitate and drive the extension of education loans to meritorious students who get admission in the top 860 quality higher educational institutions of the nation, translating to covering more than 22 lakh students every year.

PM E-Drive Scheme Launched

Cabinet approves PM Electric Drive Revolution in Innovative Vehicle Enhancement (PM E-DRIVE) Scheme with an outlay of ₹10,900 crore over a period of two years.

Assured Pension Under Unified Pension Scheme

Cabinet approved the Unified Pension Scheme on 24 August, 2024, to strengthen NPS for Central Govt employees, ensuring assured pension, family pension, minimum pension, and inflation protection.

One Nation One Subscription (ONOS)
